

# Project-006 : Bootstrap Home Page (HC-006)

## Description

Project aims to create home page with bootstrap.

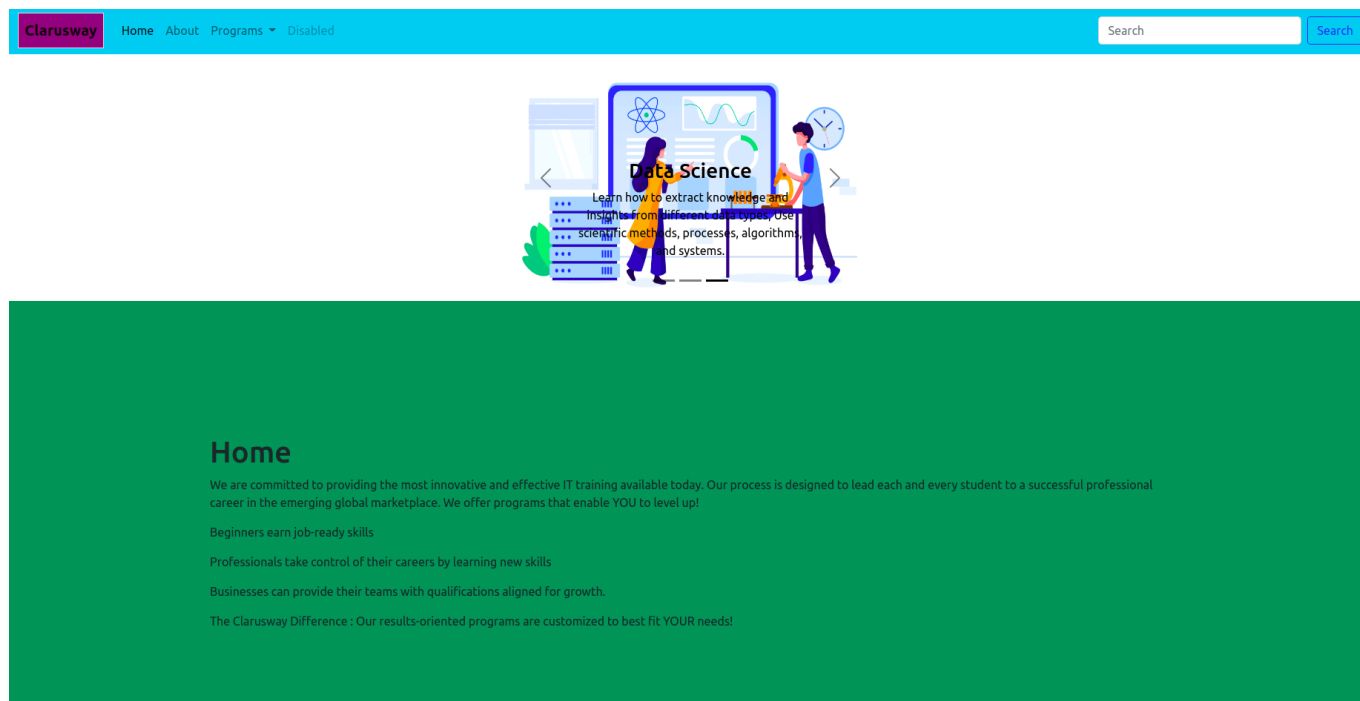

## Problem Statement

- Your company is creating its website home page with bootstrap.

## Project Skeleton

```
006-bootstrap-home-page(folder)
|
|----readme.md          # Given to the students (Definition of the project)
|----/images # Contains development team members photos
|----solution
      |----index.html
```

## Expected Outcome

## Objective

Build a responsive web page similar to [Bootstrap Home Page](#).

You can find images [here](#).

At the end of the project, following topics are to be covered;

- HTML
- CSS
- BOOTSTRAP 5

At the end of the project, students will be able to;

- improve coding skills within HTML & CSS & BOOTSTRAP
- use git commands (push, pull, commit, add etc.) and Github as Version Control System.

## Steps to Solution

- Step 1: Download or clone project repo on Github
- Step 2: Create project folder for local public repo on your pc
- Step 3: Bootstrap Home Page
- Step 4: Push your application into your own public repo on Github
- Step 5: Deploy your application on Github template to showcase your app within your team.

## Notes

- Your page should be responsive web.

 Happy Coding
